

# CapFund – Capataz®

## User Manual

Mark Vincent O. Ibarreta

Bernard D. Almachar

## Login Page

**Purpose:** The Login Page provides secure access to the Capataz® system. Users must supply valid credentials before proceeding to the dashboard.

### *Page Components*

#### Email Field:

- Accepts the registered email address.
- Must follow standard email format.

#### *Password Field*

- Accepts the user's password. Eye icon toggles visibility for easier input.

#### *Forgot Password*

- Redirects users to the password recovery page.

#### *Sign In Button*

- Submits login credentials for authentication. Displays error prompts if inputs are invalid.

#### *Create Account Link*

- Allows new users to register for a Capataz® e-wallet account.

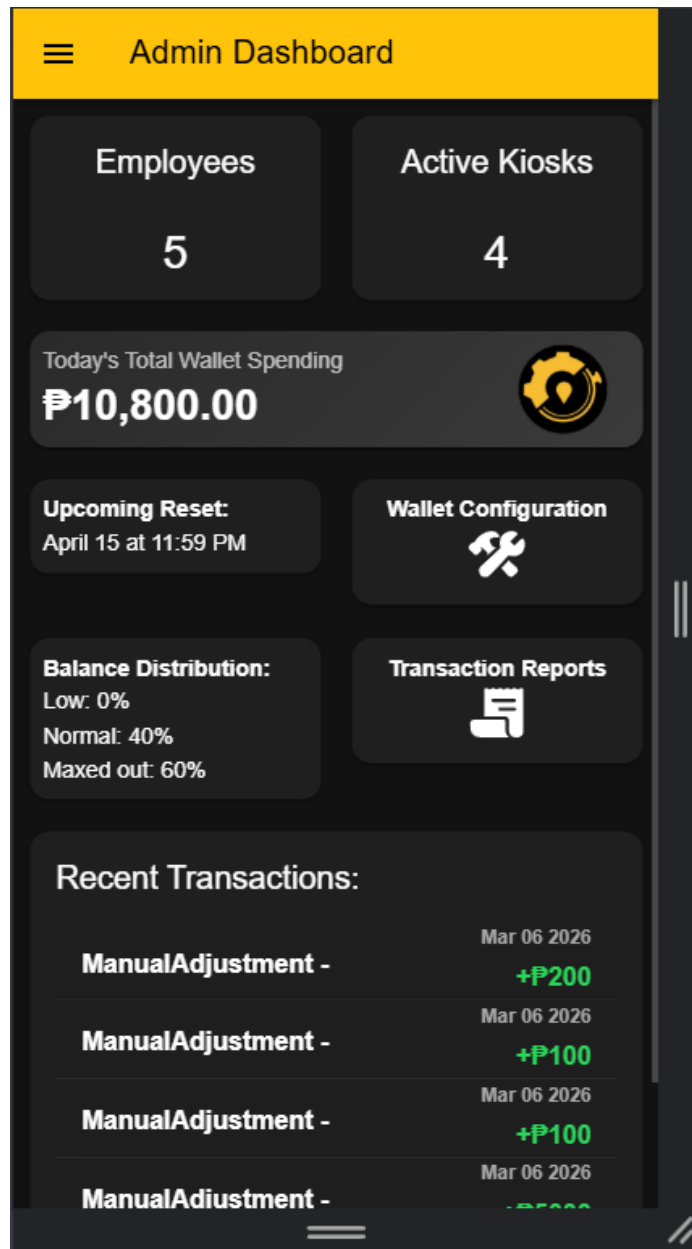

#### How to Log In

1. Enter your registered Email.
2. Enter your Password.
3. (Optional) Tap the eye icon to double check your input.
4. Click Sign In.
5. Wait for the system to validate your credentials.

#### Troubleshooting

##### Invalid Credentials:

- Re-check input or use Forgot password.
- Unregistered Email: Use Create account to register.
- No Reset Email Received: Check Spam/Junk folder and retry.

## Admin Dashboard

Purpose: The Admin Dashboard provides an at-a-glance overview of system activity, employee wallet usage, kiosks status, and key administrative shortcuts. It allows administrators to monitor operations and access important tools quickly.

### *Dashboard Components*

Employees - Displays the total number of registered employees in the system. Helps administrators monitor user population.

Active Kiosks - Shows the number of kiosks currently online and available for transactions. Useful for checking system uptime and operational readiness.

Current Total Spending (Monthly) - Indicates the total spending of all employee wallets for the current month. Helps to track budget utilization and spending trends in real time.

Wallet Reset Date & Time - Shows the next scheduled wallet reset. Ensures admins are aware of credit refresh cycles.

Wallet Configuration (Shortcut Button) - Direct link to wallet settings. Allows quick adjustments to: Allowances, Reset schedules, & Spending limits

Balance Distribution Analytics - Visual overview of employee wallet usage levels. Common categories may include:

- Low: Employees nearing zero balance
- Moderate: Average consumption
- Maxed Out: Employees who reached the allowance limit

Transaction Reports (Shortcut Button) - Quickly opens the reporting module. Administrators can generate, filter, and export transaction records.

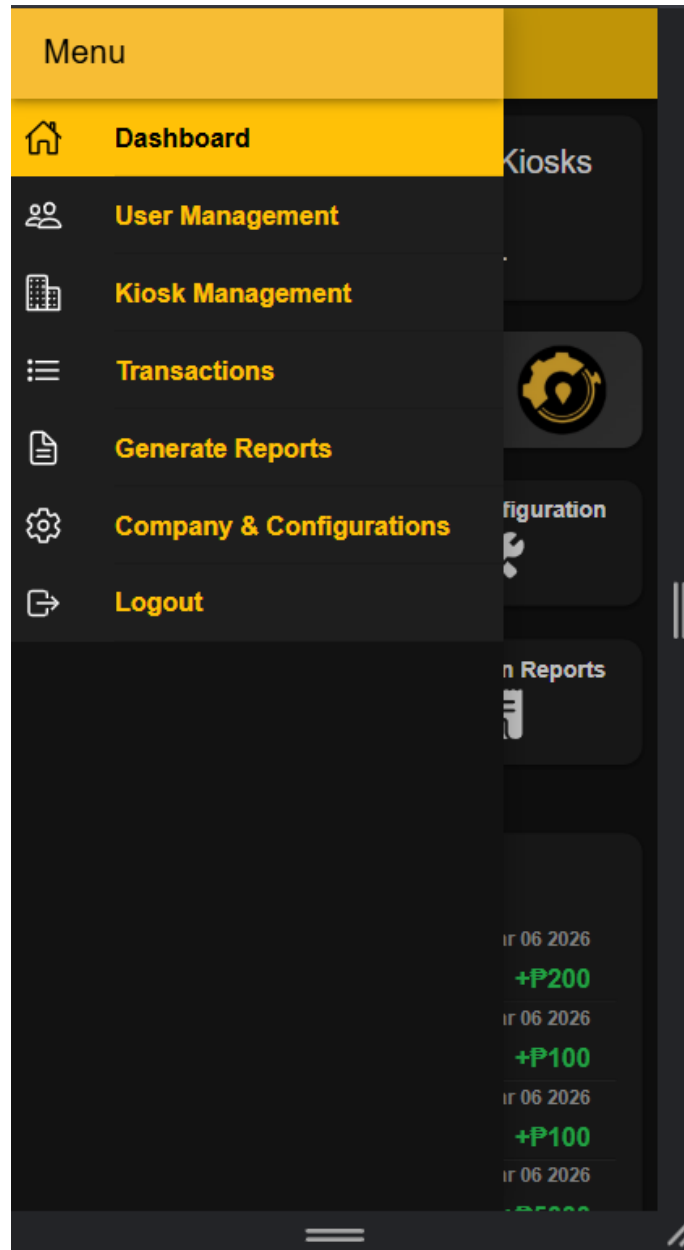

Recent Transactions - Displays the latest wallet transactions, including:

- Manual adjustments
- Deductions
- Timestamp of each entry

Helps admins monitor recent financial activities and detect anomalies.

### *How to Use the Dashboard*

1. Review Employees and Active Kiosks to confirm operational readiness.
2. Monitor Total Spending to track monthly consumption.
3. Check the Wallet Reset Schedule to prepare for allowance refresh cycles.
4. Use the Wallet Configuration and Transaction Reports buttons for quick administrative actions.
5. Refer to Balance Distribution and Recent Transactions for real-time insights on user spending behavior.

## Menus

*User Management* - The User Management module allows administrators to manage all system users, including kiosk employees and operators.

- View Users – Displays a list of all registered users in the system.
- Edit User Details – Modify user information such as name, role, or account status.
- Add New Users / Kiosk Operators – Register additional kiosk operators or administrative personnel.
- Deactivate or Reactivate Accounts – Manage user access according to company policy.

*Kiosk Management* - The Kiosk Management module provides control over all kiosks connected to the Capataz® platform.

- View All Kiosks – Shows each kiosk and its current status (active/inactive).
- Activate / Deactivate Kiosks – Temporarily disable kiosks for maintenance or security.
- Create New Kiosks – Register new kiosks and configure their operational parameters.
- Monitor Kiosk Availability – Quickly assess which kiosks are online and fully functional.

*Transactions* - The Transactions module displays the full history of employee wallet activities.

- View Transaction History – Access detailed logs of deductions, manual adjustments, and timestamps.
- Filter by Date, User, or Type – Customize the view to narrow down results.
- Export Transactions – Generate downloadable reports for auditing or analysis.
- Identify Spending Patterns – Useful for compliance and financial monitoring.

*Reports* - The Reports module allows administrators to generate formatted and filterable financial reports.

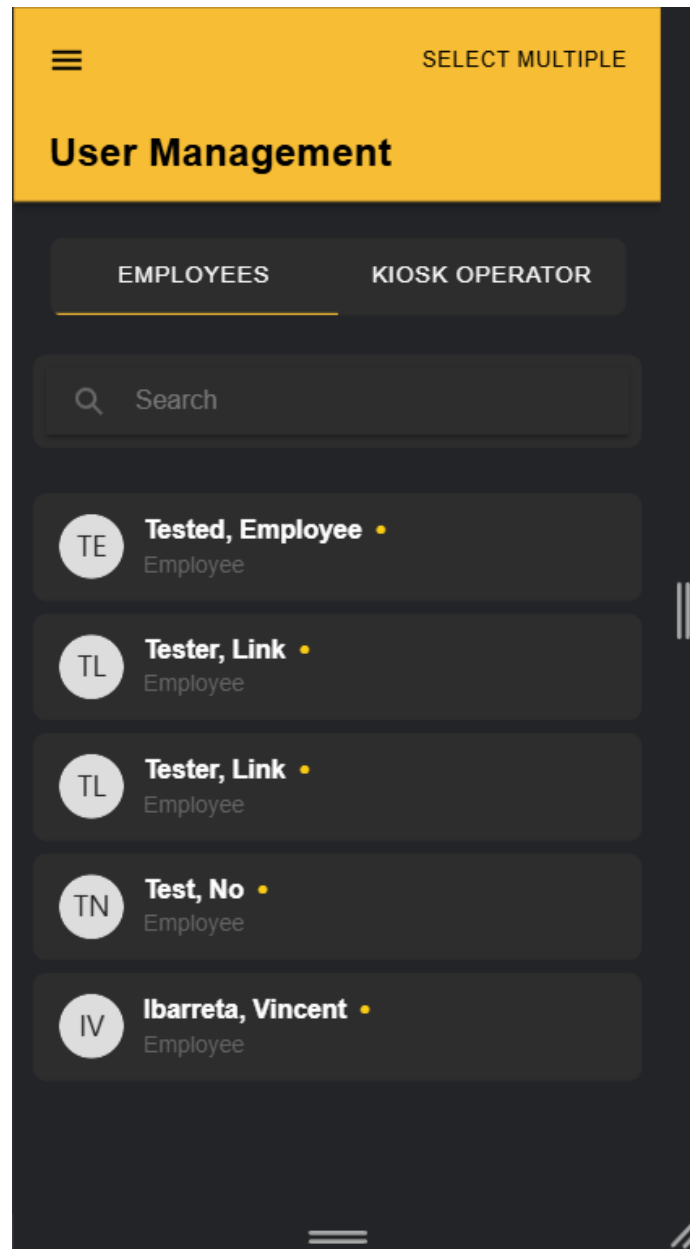

- *Transaction Report Generation* – Create formal reports based on spending activity.
- Downloadable Files – Export reports for compliance, billing, or internal review.
- Filter Options – Generate targeted reports based on date range, kiosk, or employee.

*Company & Configuration* - The Company and Configuration module provides administrative access to company-level details and wallet rules.

- Edit Company Information – Update company name, contact details, and branding.
- Wallet Configuration – Adjust system-wide settings such as:
  - Allowance amounts
  - Reset schedules
  - Spending limits
- Financial Policy Management – Apply rules that affect all users in the system.

*Logout* - The Logout option securely ends the current user's session.

- Prevents unauthorized access. Recommended when using shared or public devices. Redirects back to the Login Page after signing out

User Management – Employee List Screen

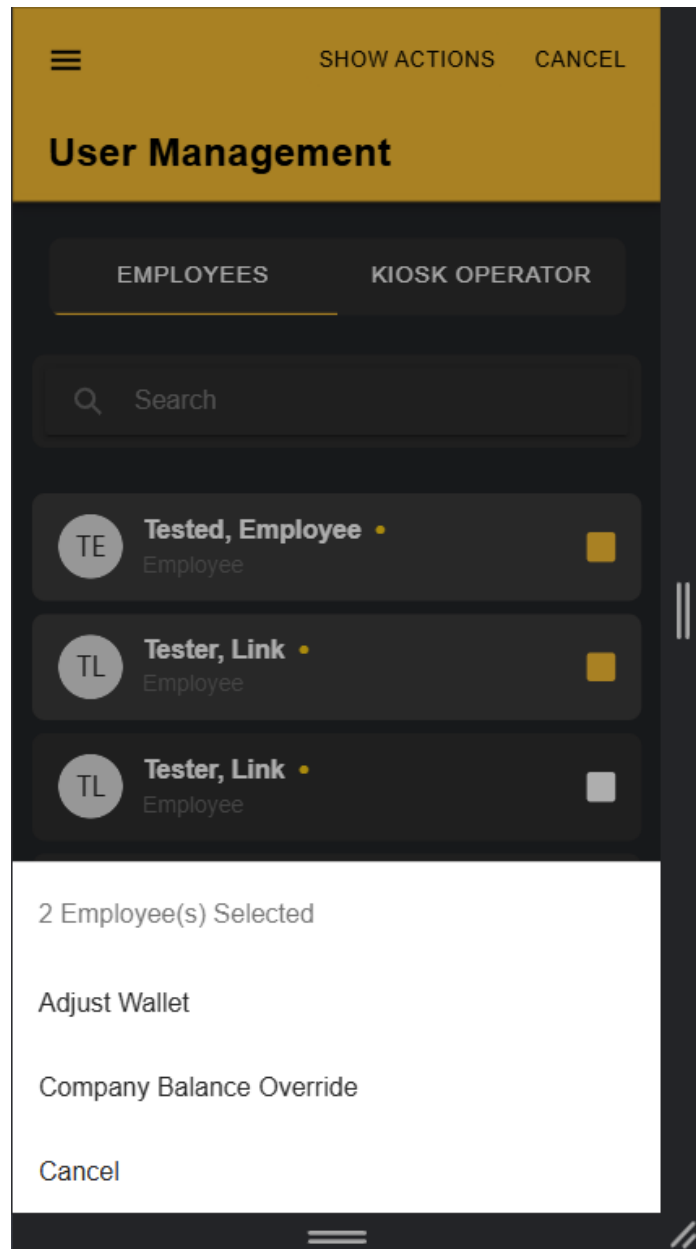

Purpose: This screen displays all employees registered in the system. Administrators can browse, search, and select employees for actions such as wallet adjustments or company balance overrides.

### Key Components

- Employees / Kiosk Operator Tabs - Allows switching between employee accounts and kiosk operator accounts.
- Search Bar - Filters the employee list based on text input.
- Employee List - Shows all employees with their initials, full name, and role label.
- Select Multiple Button (when activated) - Enables multi-selection mode to perform bulk actions.

### How to Use

- Select Employees to view employee accounts.
- Use the Search field to filter names.
- Tap an employee entry to view available actions or switch to multi-select mode to choose multiple employees.

User Management – Multi-Select Mode

Purpose: This mode allows administrators to select multiple employees and perform batch operations.

### Key Components

- SHOW ACTIONS / CANCEL Buttons - Allows viewing bulk actions or cancelling multi-select mode.
- Checkboxes - Tap the checkbox beside each employee to include them in the bulk action.
- Actions Panel - Displays available bulk actions once employees are selected:
  - Adjust Wallet
  - Company Balance Override

### How to Use

1. Activate multi-select mode via the top-right option.
2. Tap the checkboxes to select employees.
3. Tap Show Actions to reveal available operations.
4. Select an action to proceed.

Company Balance Override Screen

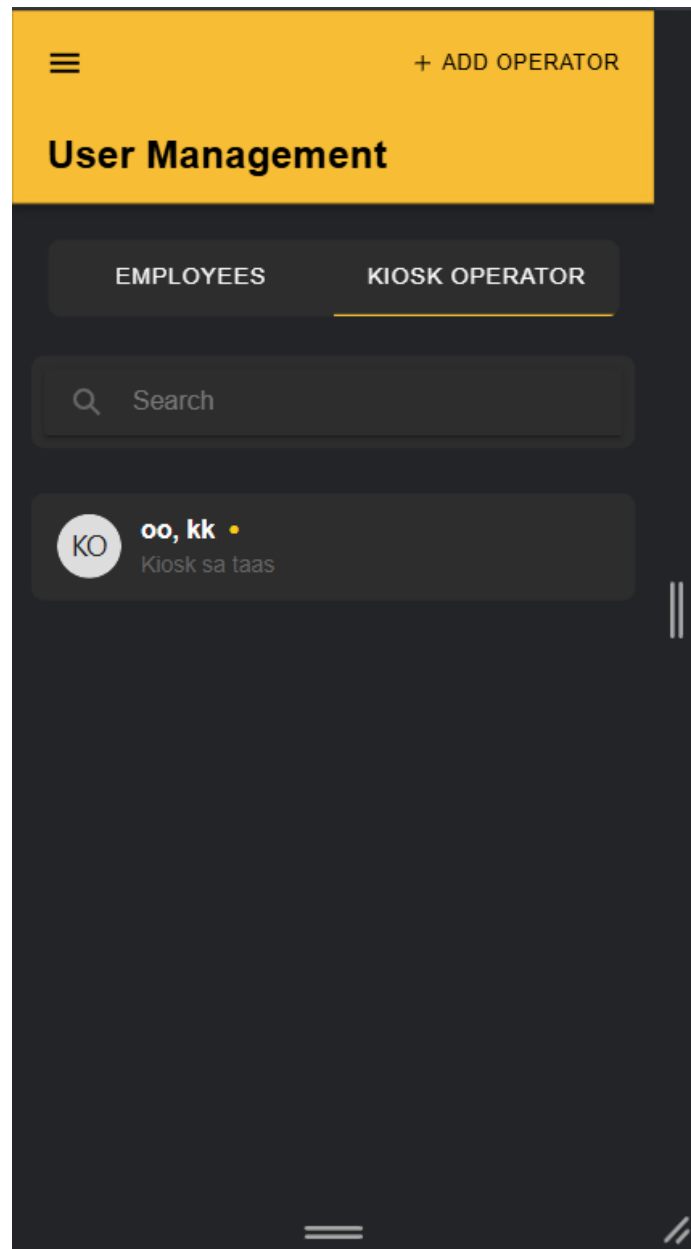

Purpose: This screen allows administrators to override the default company wallet balance for all selected employees during every scheduled reset.

### Key Components

- Amount Field - Enter the custom balance amount to apply.
- Warning Notice - Informs the user that this action replaces the company's default reset amount.
- Selected Employees List - Displays the employees affected by this override.
- Submit / Cancel Buttons - Finalize or cancel the override action.

### How to Use

1. Enter an override amount.
2. Review the selected employees.
3. Tap Submit to apply the override.

User Management – Kiosk Operator List Screen

Purpose : Displays all kiosk operators registered in the system.

### Key Components

- Employees / Kiosk Operator Tabs - Switches between employee and operator accounts.
- Search Bar - Filters kiosk operator entries.
- Operator List - Shows each operator with initials, name, and assigned kiosk.
- Add Operator Button - Opens the operator registration form.

### How to Use

1. Select Kiosk Operator tab.
2. Search for an operator using the search field.
3. Tap + Add Operator to register a new kiosk operator.

A mobile application interface for adding a kiosk operator. The screen has a dark theme with a yellow header bar. The header bar contains a back arrow and the title "Add Kiosk Operator". Below the header, there is a registration form with several input fields: "Confirm Password", "First Name", "Middle Name", "Last Name", "Address", and "Birth Date". The "Birth Date" field includes a date picker icon. Below the input fields, there is a section labeled "Assign To" with a dropdown menu showing "Select Kiosk". At the bottom of the form, there are two buttons: "REGISTER" (yellow) and "CANCEL" (gray). The form is centered on the screen, and there are navigation icons (three horizontal lines and two slanted lines) on the right and bottom edges of the screen.

Add Kiosk Operator – Registration Form

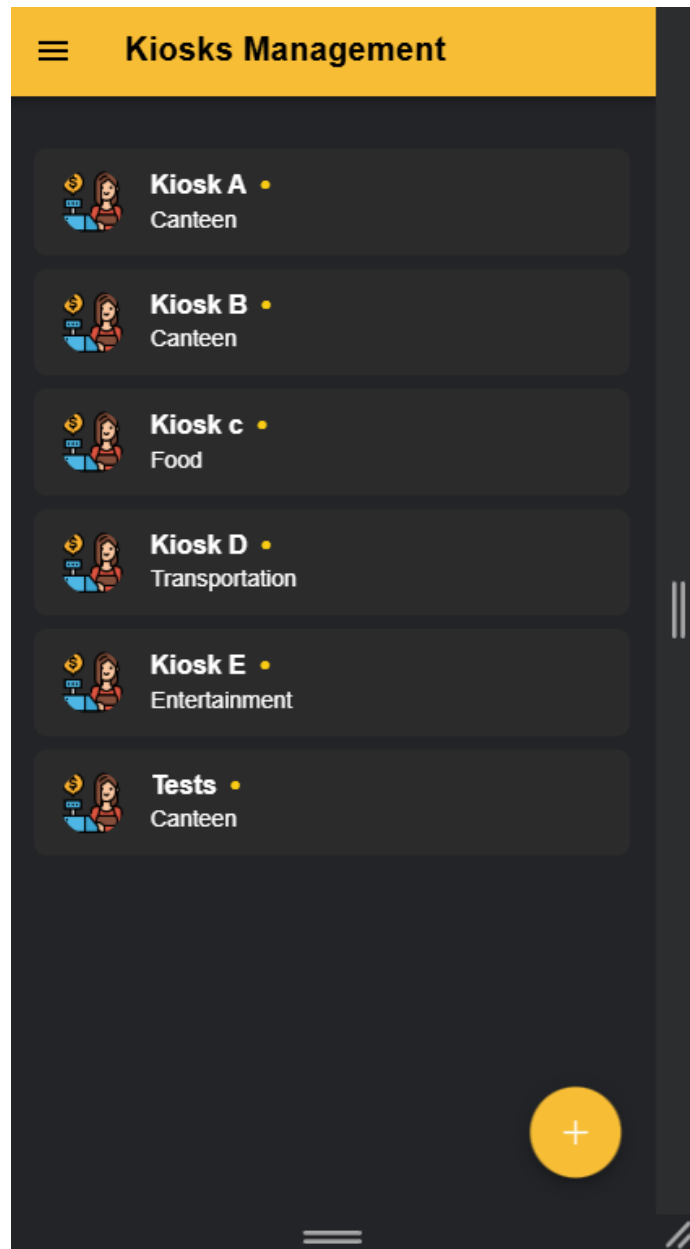

Purpose: Allows administrators to register new kiosk operators and assign them to a kiosk.

### Key Components

- Email Field - Enter the operator's login email.
- Password and Confirm Password Fields - Required for account creation.
- Personal Information Fields - First Name, Middle Name, Last Name, Address, Birth Date.
- Assign To (Kiosk Dropdown) - Select a kiosk where the operator will be assigned.
- Register / Cancel Buttons - Finalizes or cancels the registration.

### How to Use

1. Fill in all required fields.
2. Choose the kiosk assignment.
3. Tap Register to complete the process.

Kiosks Management – Kiosk List Screen

Purpose: This screen displays all kiosks registered in the system. Administrators use this page to view kiosk details, monitor status, and manage kiosk records.

### Key Components

- Kiosk Cards - Each card displays the kiosk name and its assigned category (e.g., Canteen, Food, Entertainment).
- Status Indicator - A small colored mark beside each kiosk name shows if the kiosk is active or inactive.
- Add Kiosk Button ( + ) - Located at the lower-right corner; opens the Add Kiosk form.
- Navigation Menu Icon - Opens the main menu containing system modules.

### How to Use

1. Scroll through the list to browse all kiosks.
2. Tap a kiosk card to view or edit its details.
3. Tap the + button to add a new kiosk.

Edit Kiosk Screen

Purpose: This screen allows administrators to modify kiosk details or remove a kiosk from the system.

### Key Components

- Name Field - Displays the kiosk name and allows editing.
- Location Field - Displays the kiosk location for updating.
- Status Dropdown - Allows setting the kiosk to Active or Inactive.
- Device Type Dropdown - Choose the kiosk's device type.
- Update Button - Saves changes made to the kiosk.
- Delete Icon - Allows removing the kiosk entirely.
- Close Button - Exists without saving changes.

### How to Use

1. Update the kiosk name, location, or settings as needed.
2. Change the kiosk Status if enabling or disabling it.
3. Tap Update to save all modifications.
4. Use the Delete icon if the kiosk must be permanently removed.
5. Tap Close to exit without changes.

Add Kiosk Screen

Purpose: This screen allows administrators to create and register a new kiosk in the system.

### Key Components

- Name Field - Enter the kiosk's name.
- Location Field - Enter the physical or designated location of the kiosk.
- Category Dropdown - Select the kiosk category (e.g., Canteen, Food, Entertainment).
- Device Type Dropdown - Choose the device type used by the kiosk.
- Submit Button - Saves the new kiosk once all required fields are filled.
- Close Button - Exits the screen without saving.

### How to Use

1. Enter the kiosk name and location.
2. Choose the appropriate Category and Device Type.
3. Tap Submit to create the kiosk.
4. Tap Close if you do not want to save changes.

Transactions – Transaction List Screen

Purpose: This screen displays a list of all transactions that match the current filters and date range.

### Key Components

- Month Header (e.g., “March 2026”)
- Shows the currently displayed month of transactions.
- Transaction Entries
  - Each entry includes:
    - Transaction type (e.g., Manual Adjustment from Company)
    - User involved
    - Date of transaction
    - Amount (green text for positive/credited values)
- Pagination Controls - Displays the page number and allows navigation if multiple pages exist.
- Search Bar - Filters the list by employee name.

### How to Use

1. Scroll through the transactions to review activity.
2. Use the search bar to find transactions by employee name.
3. Use Previous and Next (if available) to navigate pages.

## Transactions – Employee Selection Filter Screen

**Purpose:** This screen lets administrators refine the transaction list by selecting specific employees whose transactions they want to view.

### Key Components

- **Select All Checkbox** - Selects every employee in the list.
- **Employee List** - Displays all available employee names with individual checkboxes.
- **Continue Button** - Confirms the selected employees and applies the filter.

### How to Use

1. Scroll through the list and select one or more employees.
2. Use Select All to include all employees instantly.
3. Tap Continue to apply the filter and return to the transaction list.

Transactions – Filter Panel Screen

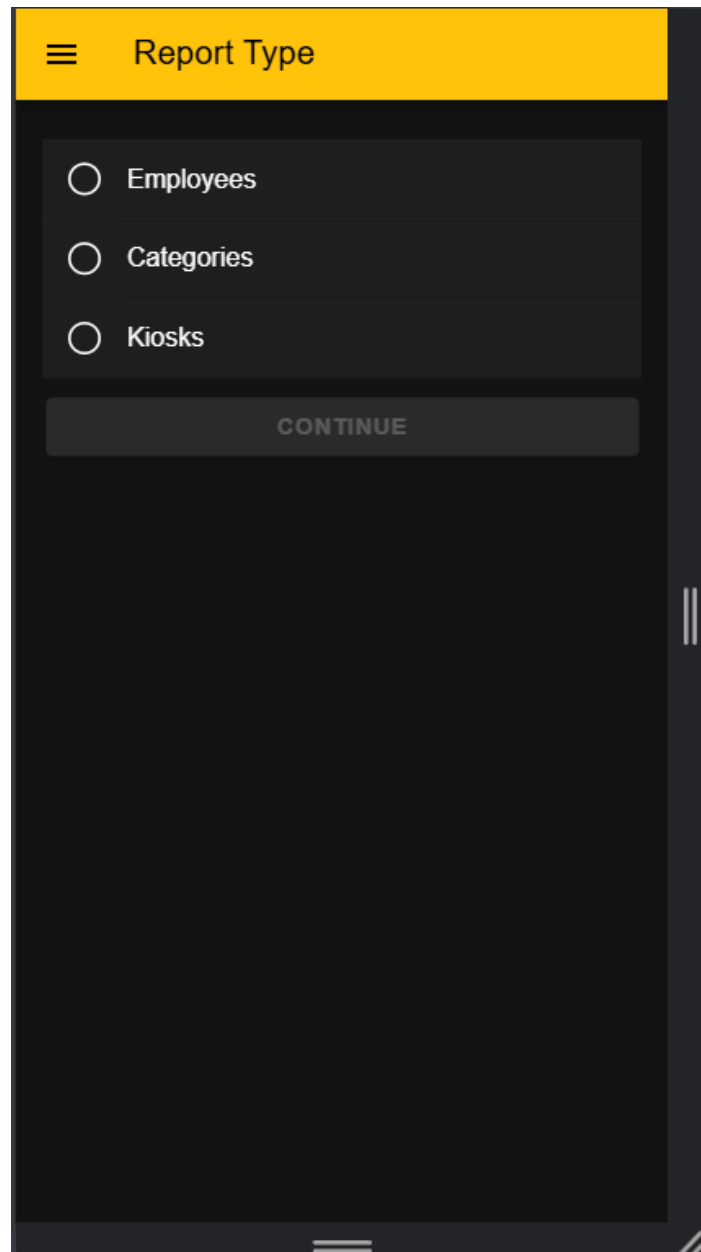

Purpose: This screen allows administrators to filter transaction records by date range, transaction type, status, category, or kiosk before viewing results.

### Key Components

- Start Date - Opens a date picker to select the beginning of a date range.
- End Date - Opens a date picker to select the end of a date range.
- Transaction Types Dropdown - Allows filtering by transaction types (e.g., adjustments, deductions).
- Transaction Statuses Dropdown - Lets users filter by status (e.g., completed, pending).
- Categories Dropdown - Filters transactions based on kiosk categories.
- Kiosks Dropdown - Filters based on individual kiosks.
- Clear Button - Resets all selected filters.
- Apply Button - Applies filter selections and updates the transaction list.

### How to Use

1. Tap Start Date and End Date to set the date range.
2. Select desired options from each dropdown (optional).
3. Tap Apply to filter the transaction list.
4. Tap Clear to reset filters and show all results.

Report Type Selection Screen

Purpose: This screen allows administrators to choose what type of report they want to generate before proceeding with filtering and exporting.

## Key Components

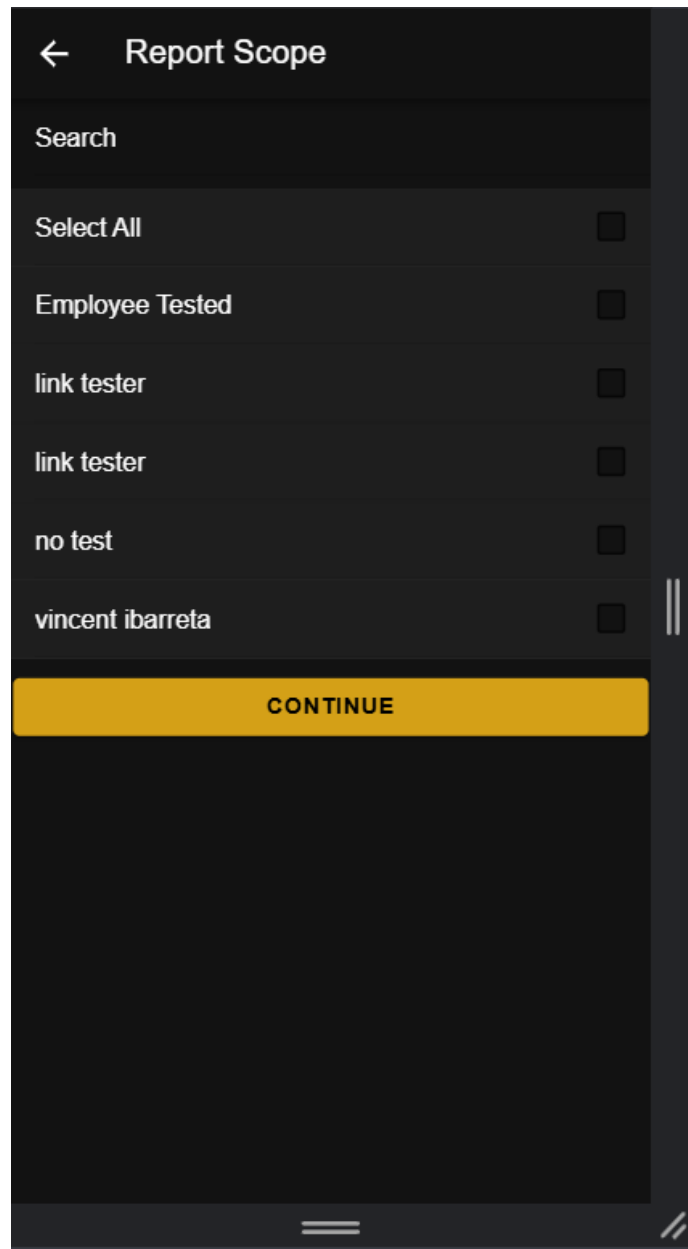

### Report Options

- Employees – Generates reports based on employee transaction activity.
- Categories – Generates reports grouped by kiosk categories.
- Kiosks – Generates reports grouped by kiosk location or device.

Continue Button - Activates once a report type is selected.

### How to Use

1. Select Employees, Categories, or Kiosks.
2. Tap Continue to proceed to scope selection.

Report Scope Selection Screen

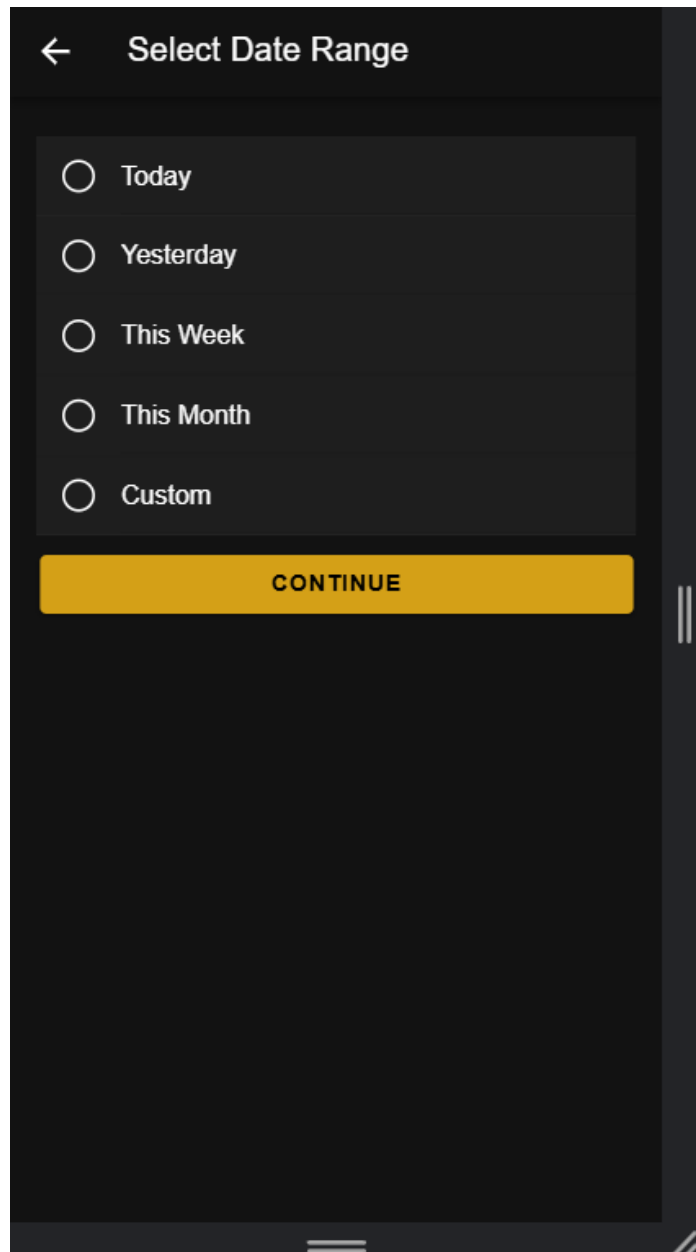

Purpose: This screen allows administrators to define the specific items included in the report, such as employees, kiosk categories, or kiosks.

### Key Components

- Search Bar - Filters the list of available items.
- Select All Checkbox - Selects every item in the list.
- Item List - Displays names of employees, categories, or kiosks depending on the previously chosen report type.
- Continue Button - Proceeds to the date-range selection screen.

### How to Use

1. Scroll through the list and check the boxes beside the desired items.
2. Use Select All to include every item.
3. Tap Continue to proceed.

Select Date Range Screen

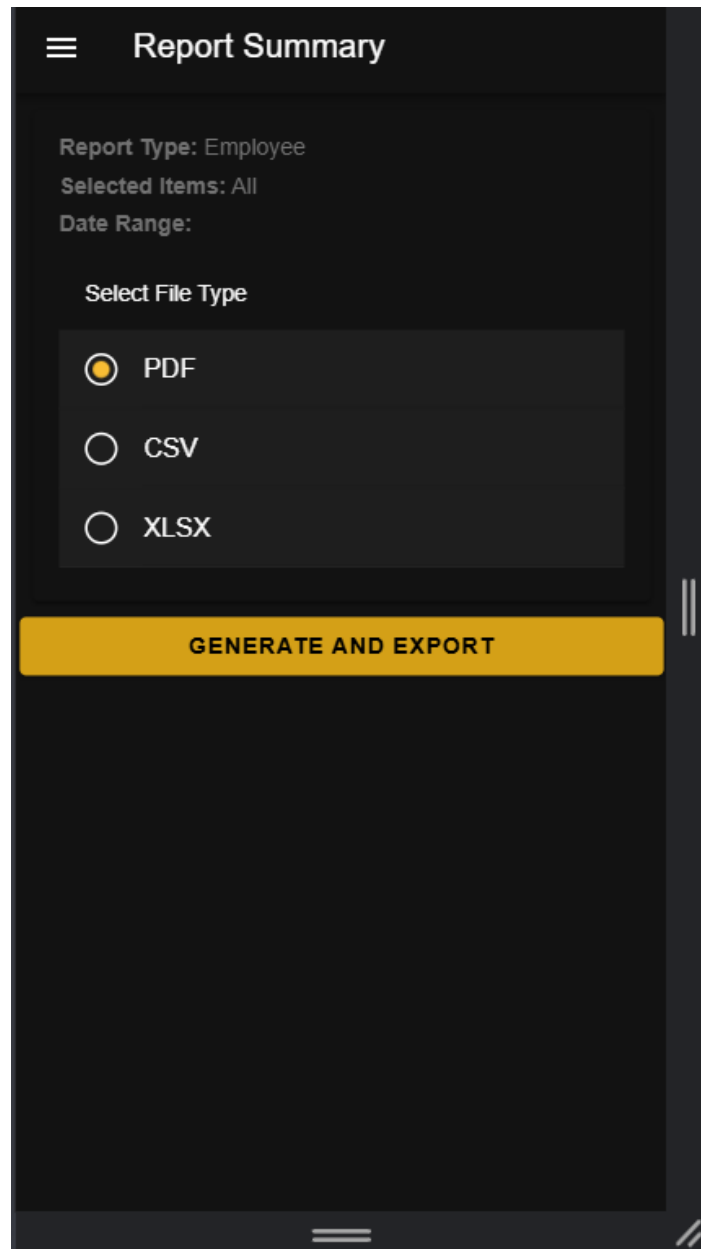

Purpose: This screen defines the time period for the report.

### Key Components

- Preset Date Ranges
  - Today
  - Yesterday
  - This Week
  - This Month
  - Custom – Opens a calendar to choose specific start and end dates.
- Continue Button - Moves to the final summary screen.

### How to Use

1. Select a preset range or choose Custom for a specific date period.
2. For Custom, select a start and end date.
3. Tap Continue to move to the report summary.

Report Summary Screen

Purpose: The summary screen displays all selections before generating the final downloadable report.

### Displayed Information

- Report Type (e.g., Employees, Categories, Kiosks)
- Selected Items (All or specific selections)
- Date Range (Preset or custom)

### Key Components

- File Type Selection
  - PDF – Printable, formatted report
  - CSV – Spreadsheet-compatible, great for raw data
  - XLSX – Excel-formatted report
- Generate and Export Button - Creates and downloads the report in the selected format.

### How to Use

1. Review the displayed details to ensure accuracy.
2. Select your preferred file type.
3. Tap Generate and Export to download the report.

Company & Configuration – Company Details Screen

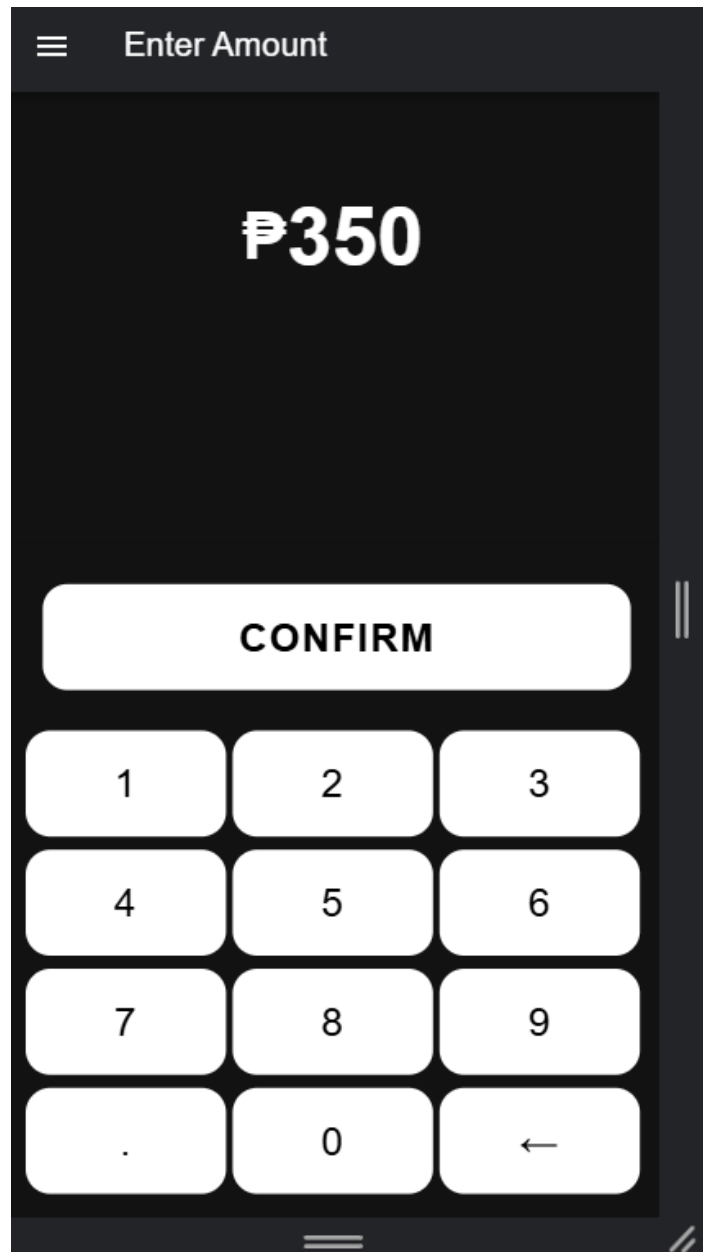

Purpose: This screen allows administrators to update company-related information such as company name, address, and company code.

### Key Components

- Company Field – Displays and allows editing of the company name.
- Address Field – Shows the company address for modification.
- Company Code – Fixed reference code displayed for identification.
- Save Button – Saves any changes made to the company details.
- Cancel Button – Discards changes and reverts to previous values.

### How to Use

1. Edit the Company or Address fields as needed.
2. Tap Save to apply the changes.
3. Tap Cancel to exit without saving.

Kiosk – Enter Amount Screen

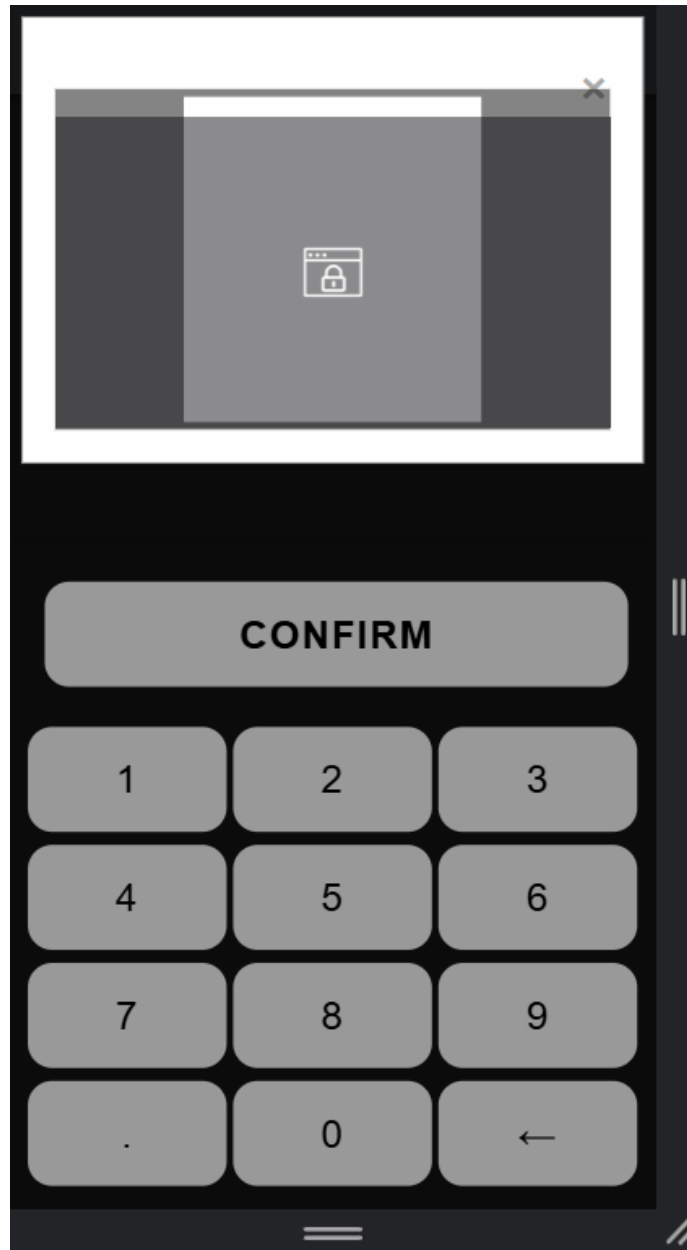

Purpose: This screen allows kiosk users to enter the transaction amount before confirming a purchase or deduction.

### Key Components

- Amount Display - Shows the amount currently entered.
- Numeric Keypad - Allows input of digits and decimals.
- Backspace Button - Deletes the last character entered.
- Confirm Button - Proceeds to the next step after entering the amount.

### How to Use

1. Enter the transaction amount using the keypad.
2. Review the displayed value.
3. Tap Confirm to proceed.

Kiosk – QR Scan Popup

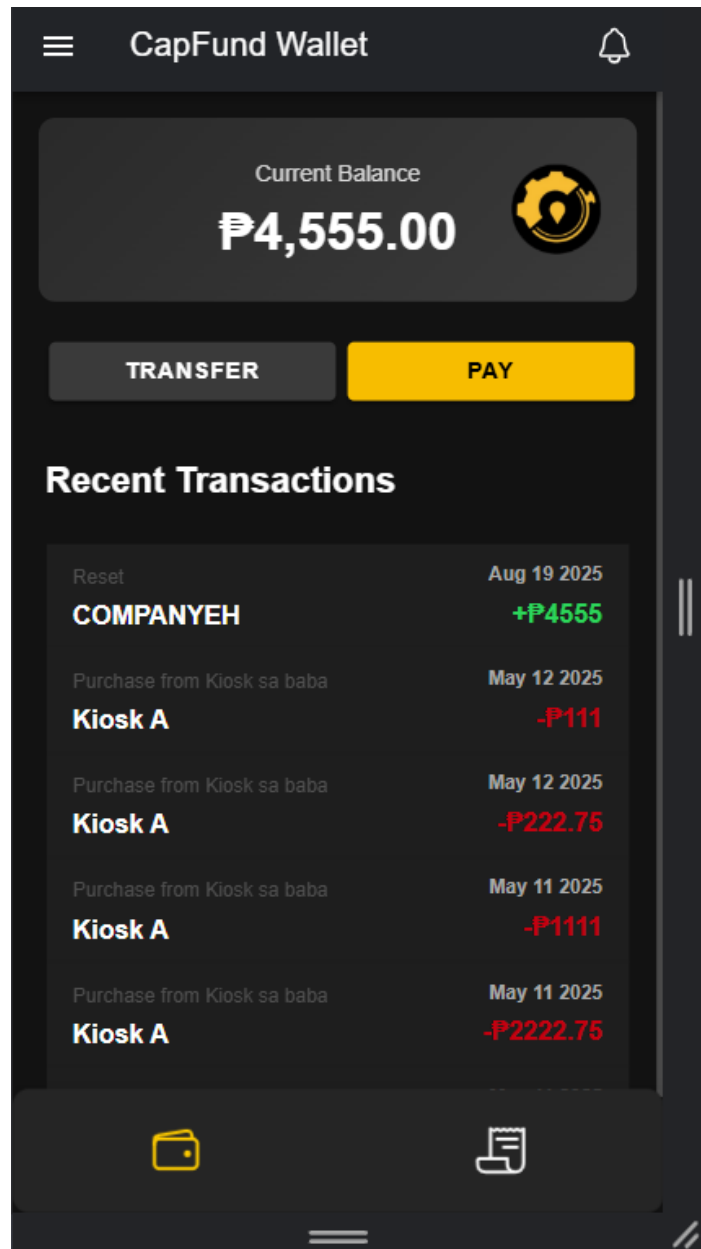

Purpose: This screen shows a camera or QR preview used to scan an employee's payment QR code.

### Key Components

- Camera / QR Scan Frame - Displays the live camera preview used for scanning.
- Close (X) Button - Closes the scan window and returns to the previous screen.
- Confirm Button (Disabled Until Scan Completes) - Allows confirmation only after a valid QR code is detected.
- Numeric Keypad (Disabled) - Not usable until the QR scan is validated.

### How to Use

1. Position the employee's QR code within the scan frame.
2. Wait for the system to detect and confirm the QR code.
3. Once active, tap Confirm to continue.

Employee Dashboard

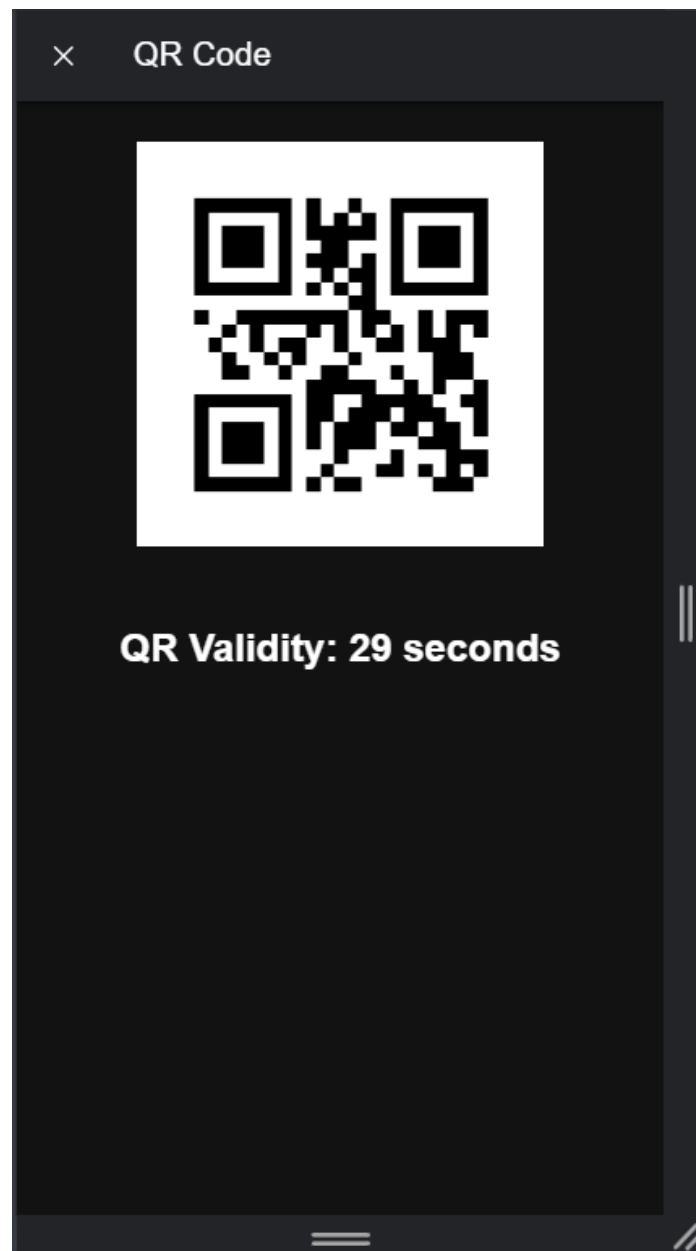

Purpose: This screen shows employees their current wallet balance, payment options, and recent transactions.

### Key Components

- Current Balance Display - Shows the employee's available wallet funds.
- Transfer Button - Shortcut for transferring funds (if enabled).
- Pay Button - Opens the employee QR payment screen.
- Recent Transactions List - Displays previous resets, kiosk purchases, and wallet activities with timestamps and amounts.

### How to Use

1. View Current Balance to check available funds.
2. Tap Pay to generate a QR code for kiosk scanning.
3. Scroll down to review Recent Transactions.

Employee QR Pay – QR Code Screen

Purpose: This screen generates a time-limited QR code for employees to use when paying at kiosks.

### Key Components

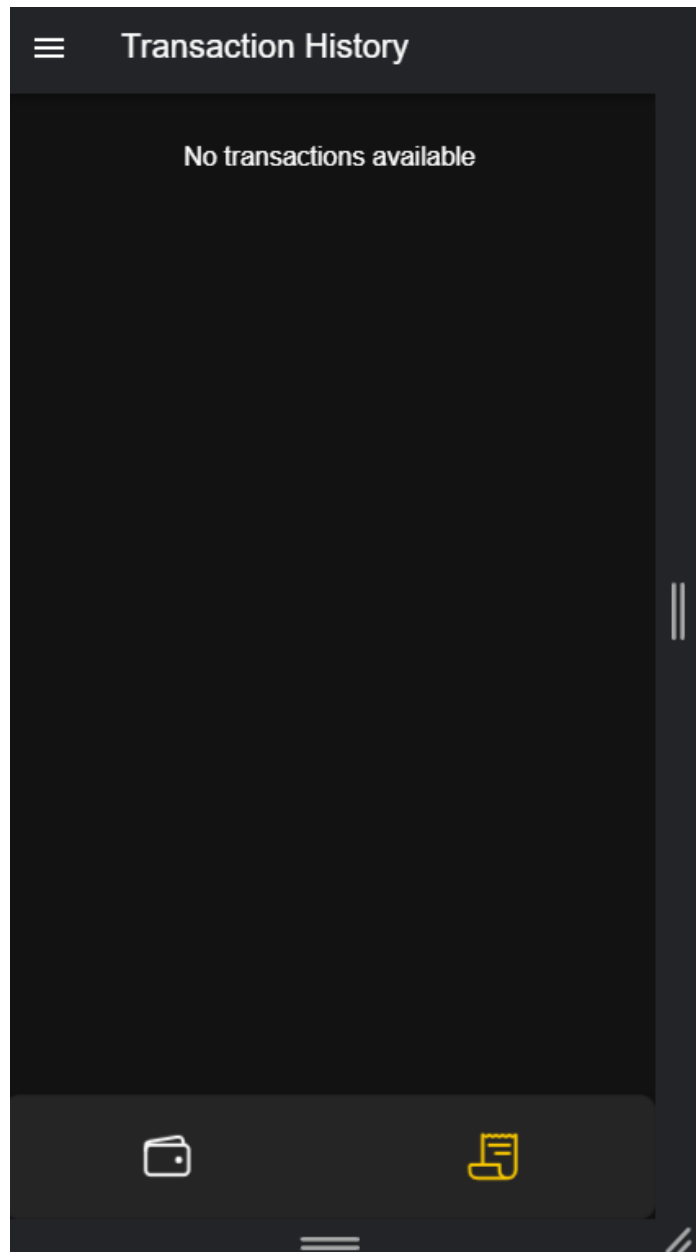

QR Code - Unique, scannable code for initiating a kiosk transaction.

QR Validity Timer - Shows how long the QR will remain active.

Close Button - Returns the user to the previous menu.

### How to Use

1. Show the QR code to the kiosk scanner.
2. Ensure the QR is scanned before the timer expires.
3. Tap Close if you wish to cancel or generate a new QR.

Transaction History Screen

Purpose: This screen shows a complete list of an employee's past transactions.

### Key Components

- Transaction List - Displays all historical purchases, resets, and adjustments.
- Empty State Message - Appears when no transactions are available.
- Bottom Navigation Menu - Allows switching between Wallet Dashboard and History.

### How to Use

1. Scroll to browse past transactions.
2. If no items appear, the message "No transactions available" will be shown.
3. Use the bottom navigation to return to the wallet dashboard.
